

# Prakhar Verma

MACHINE LEARNING RESEARCHER · AALTO UNIVERSITY · SPECTACULARAI

Jämeräntäival 11 J, 205, Espoo, Finland.

☎ (+358) 0466144806 | ✉ prakhar.verma7@gmail.com | 🏠 www.prakharverma.github.io | 📺 vermaprakhar

## Education

### Aalto University

MASTER OF SCIENCE (M.Sc.)

Finland

2019 - 2021

- Major in Machine Learning, Data Science, and Artificial Intelligence
- Minor in Mathematics
- 4.7/5 (Pass with Honors)

### Uttarakhand Technical University

BACHELOR OF TECHNOLOGY (B.TECH.)

India

2012 - 2016

- Specialization in Information Technology
- 79.03% (First Division with Honors)

## Professional Experience

### SpectacularAI

RESEARCH ENGINEER (PART-TIME)

Espoo, Finland

September 2021 - Present

Consultant for an electronic firm researching methods to incorporate uncertainty in their deep learning models, making them robust.

### Aalto University

RESEARCH ASSISTANT

Espoo, Finland

April 2020 - Present

Member of the [AaltoML group](#) focusing on probabilistic machine learning to develop learning methods and efficient approximate inference methods for dynamic systems and stochastic differential equation (SDE) models.

TEACHING ASSISTANT

Spring 2020, 2021

**Deep Learning (CS-E4890)**: One of the teaching assistants responsible for assignments creation and supervision along with the professor.

### TomTom

SOFTWARE ENGINEER (R&D)

Pune, India

July 2016 - August 2019

- **Automatic Feature Extraction from Satellite Imagery**  
*Researched and developed a semantic segmentation solution for extracting map features from satellite imagery and automatically ingesting them into the database, removing human-in-the-loop.*
- **Raah: Real-time Map**  
*Developed a POC for a real-time map vector tile server, which was later converted into an open platform product.*
- **On-field map reporting surveying tool**  
*Developed an ArcGIS plugin used daily by surveyors across the globe for field surveying and reporting.*

## Publications

- **Prakhar Verma**, Vincent Adam, Arno Solin. Sparse Gaussian Processes for Stochastic Differential Equations. *The Symbiosis of Deep Learning and Differential Equations (DLDE), NeurIPS Workshop, 2021.*
- Arno Solin, Ella Tamir, **Prakhar Verma**. Scalable Inference in SDEs by Direct Matching of the Fokker–Planck–Kolmogorov Equation. *Advances in Neural Information Processing Systems 35 (NeurIPS), 2021.*
- Fuzail Palnak<sup>+</sup>, Kshitij Nikhal<sup>+</sup>, **Prakhar Verma**<sup>+</sup>, Ravi Panchani<sup>+</sup>, and Sagar Rohankar<sup>+</sup>. M.A.G.E.C: machine assisted geometry extraction and creation. *Twelfth International Conference on Machine Vision (ICMV 2019).*

## Theses

- Verma, P. (2021). Sparse Gaussian processes for stochastic differential equations [Master's thesis]. Aalto University. [PDF](#)
- Verma, P. (2016). Development of automated GIS Tools on various platforms [Bachelor's thesis]. Uttarakhand Technical University, TomTom India. [PDF](#)

## Skills & Interests

---

- Probabilistic machine learning, Gaussian processes, Bayesian learning, uncertainty quantification, deep learning, optimization
- Python, PyTorch, GPFLOW, numPy, scikit-learn, JAX, AWS

## Presentations

---

- Tensorflow case study on how convolution neural networks can be used to extract road networks and airports from satellite imagery and how TFServing can host the models at [Google Developers Group 2018](#).
- An end-to-end machine learning framework to detect and extract essential map features from satellite imagery and ingest them into the database removing human-in-the-loop at [GeoSpatial World Forum 2018](#).

## Accomplishments

---

- Awarded “Dean Scholarship” in 2020 and 2021 at Aalto University.
- Awarded “Face of TomTom 2018” for actively representing TomTom in conferences and promoting the brand.
- Winner of TomTom “Innovation Day 2018”, presented an artificial intelligence plugin which bridges the gap between machines and cartographers.
- Mentor at “TomTom External Hackathon 2018”.
- “Electronic Health Record” idea was selected in Top 10 at a national event, “India Ideathon 2015”.

## Projects

---

### Spectral Graph Analysis

AALTO UNIVERSITY

November 2019

The project aims to perform graph partitioning with the use of Spectral Clustering on social network graphs. The goal is to minimize the number of cuts while maintaining cluster size balance.

More details: [Github Repository](#)

### Bayesian Statistics Global Warming

AALTO UNIVERSITY

November 2019

The goal of the project is to examine how much the sea level rise would affect the coastal cities of Finland.

More details: [Github Repository](#)

### Speaker Adaptation

AALTO UNIVERSITY

November 2019

In this project, we present various speaker adaptation techniques based on recently developed training methods and their respective results by performance levels (word error rate percentage).

More details: [Research Paper](#)
